NOTES TO BALANCE SHEET

Notes	Description	As at	
		31 March 2023	31 March 2022
3	Share Capital :		
	Authorised Share Capital (1,00,000 Equity Shares of Rs.10/- each, March 31, 2022: 1,00,000 Equity Shares)	10,00,000	10,00,000
	Issued, Subscribed & Paid up : (10,000 Equity Shares of Rs.10/- each, March 31, 2022: 10,000 Equity Shares of Rs.10/- each)	1,00,000	1,00,000
		1,00,000	1,00,000

Note:

During the period of five years immediately preceding the date as at which the Balance Sheet is prepared, the company has not

- (i) allotted any fully paidup equity shares by way of bonus shares;
- (ii) allotted any equity shares pursuant to any contract without payment being received in cash;
- (iii) bought back any equity shares

a) Reconciliation of the Shares outstanding at the beginning and at the end of the reporting year

Equity Shares

	31-Mar-23		31-Mar-22	
	No	Amount	No	Amount
At the beginning of the year	10,000	1,00,000	10,000.00	1,00,000
Issued during the year	-	-	-	-
Outstanding at the end of the Year	10,000	1,00,000	10,000.00	1,00,000

b) Terms/right attached to equity shares

The Company has only one class of equity shares having par value of Rs.10 per share. Each holder of equity shares is entitled to one vote per share. The dividend proposed by the Board of Directors is subject to the approval of the shareholders in the ensuing Annual General Meeting. In the event of liquidation of the Company, the holders of equity shares will be entitled to receive remaining assets of the Company, after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

c) Details of shareholders holding more than 5% shares in the Company

PRIME WEB SERVICES PRIVATE LIMITED

Notes to financial statements for the year ended 31 March 2023 (continued)

2. Significant accounting policies (continued)

Operating Cycle

Operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents.

2.3 Fixed assets and depreciation

Tangible fixed assets

Tangible fixed assets are carried at cost of acquisition less accumulated depreciation. The cost of fixed assets comprises the purchase price, taxes, duties, freight (net of rebates and discounts) and any other directly attributable costs of bringing the assets to their working condition for their intended use. Borrowing costs directly attributable to acquisition of those fixed assets which necessarily take a substantial period of time to get ready for their intended use are capitalised.

Depreciation and amortization on fixed assets is provided using the written down value method over the useful lives of assets estimated by the management. The rates of depreciation and amortization prescribed in Schedule II to the Companies Act, 2013 are considered as minimum rates. If the management's estimate of the useful life of a tangible fixed asset at the time of acquisition of the asset or of the remaining useful life on a subsequent review, is shorter than that envisaged in the aforesaid Schedule, depreciation is provided at a higher rate based on the management's estimate of the useful life/remaining useful life. Pursuant to this policy, depreciation on tangible fixed assets has been provided at the rates based on the following useful lives of fixed assets as estimated by management

	<u>Years</u>
Computer equipment	3
Servers and Networks	6
Furniture and fixtures	10
Electrical fittings	10
Office equipment	5
Office Building	30
Motor Vehicles - 2 Wheelers	10
Motor Vehicles - 4 Wheelers	8
Plant & Machinery	15

Depreciation is calculated on a pro-rata basis from / up to the month the assets are purchased / sold. Individual assets costing less than Rs. 5,000 are depreciated in full in the year of purchase. Losses arising from retirement or gains or losses arising from disposal of fixed assets which are carried at cost are recognised in the Statement of Profit and Loss. Fixed Assets at Leased Premises is depreciated on straight-line basis over the period of the lease or over the useful life as prescribed by Schedule II to the Companies Act, 2013 whichever is lower.

PRIME WEB SERVICES PRIVATE LIMITED

Notes to financial statements for the year ended 31 March 2023

1. Corporate Overview

Prime Web Services Private Limited (“the Company”) was incorporated on 08 July 2015 as a private limited company. The Company is primarily engaged in the business of providing software consultancy services.

2. Significant accounting policies

2.1 Basis of preparation of financial statements

The financial statements have been prepared and presented under the historical cost convention on the accrual basis of accounting and comply with the Accounting Standards specified under Section 133 of the Companies Act 2013 (the Act) read with Rule 7 of the Companies (Accounts) Rules 2014, other pronouncements of the Institute of Chartered Accountants of India, the relevant provisions of the Companies Act 2013 and other accounting principles generally accepted in India (GAAP) to the extent applicable. The financial statements are presented in Indian Rupees.

Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements and reported amounts of revenue and expense for the year. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Any revision to accounting estimates is recognised prospectively in current and future periods.

2.2 Current-non-current classification

All assets and liabilities are classified into current and non-current.

Assets

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realized in, or is intended for sale or consumption in, the company’s normal operating cycle;
- it is held primarily for the purpose of being traded;
- it is expected to be realized within 12 months after the reporting date; or
- it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Current assets include the current portion of non-current financial assets.

All other assets are classified as non-current.

Liabilities

A liability is classified as current when it satisfies any of the following criteria:

- it is expected to be settled in the company’s normal operating cycle;
- it is held primarily for the purpose of being traded;
- it is due to be settled within 12 months after the reporting date; or
- the company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

2. Significant accounting policies (continued)

Intangible fixed assets

Intangible assets that are acquired by the Company are measured initially at cost. After initial recognition, an intangible asset is carried at cost less accumulated depreciation and any accumulated impairment loss.

Subsequent expenditure is capitalized only when it increases the future economic benefits from the specific assets to which it relates.

Intangible assets are amortized in profit or loss over their estimated useful lives, from the date that they are available for use based on the expected pattern of consumption of economic benefits of the asset. Accordingly, at present, these are being amortised on straight line basis. In accordance with the applicable Accounting Standard, the Company follows a rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use. However, if there is persuasive evidence that the useful life of an intangible asset is longer than ten years, it is amortised over the best estimate of its useful life. The useful life of the intangibles (Computer software) has been estimated at 3 years.

Amortisation method and useful lives are reviewed at each reporting date. If the useful life of an asset is estimated to be significantly different from previous estimates, the amortisation period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortisation method is changed to reflect the changed pattern. An intangible asset is derecognised on disposal or when no future economic benefits are expected from its use and disposal. Losses arising from retirement and gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss.

2.4 Impairment of assets

The Company assesses at each balance sheet date whether there is any indication that any assets forming part of its cash generating units may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs to is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the Statement of profit and loss. If at the balance sheet date, there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the reassessed recoverable amount subject to a maximum of depreciated historical cost.

2.5 Revenue recognition

Revenue from software development and Professional services is recognized when the amount of revenue and related cost can be reliably measured and it is probable that the collectability of the related receivables is reasonably assured

2.6 Foreign currency transactions

Foreign currency transactions are recorded using the exchange rates prevailing on the dates of the respective transactions or average rate. Exchange differences arising on foreign currency transactions settled during the year are recognized in the Statement of Profit and Loss.

Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the year-end rates. The resultant exchange differences are recognised in the Statement of Profit and Loss.

PRIME WEB SERVICES PRIVATE LIMITED

Notes to financial statements for the year ended 31 March 2023 (continued)

2. Significant accounting policies (continued)

2.7 Income taxes

Income tax expense comprises current tax and deferred tax.

Current tax

The current charge for income taxes is calculated in accordance with the relevant tax regulations applicable to the Company.

Deferred tax

Deferred tax charge or benefit reflects the tax effects of timing differences between accounting income and taxable income, which originate during the year but reverse after the tax holiday period. The deferred tax charge or benefit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carry forward of losses, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed at each balance sheet date and written-down or written-up to reflect the amount that is reasonably / virtually certain to be realised.

The break-up of the deferred tax assets and liabilities as at the balance sheet date has been arrived at after setting-off deferred tax assets and liabilities where the Company has a legally enforceable right and an intention to set-off assets against liabilities and where such assets and liabilities relate to taxes on income levied by the same governing taxation laws.

Minimum Alternate Tax (MAT) Credit entitlement

Minimum Alternate Tax (MAT) credit entitlement represents amounts paid in a year under Section 115 JAA of the Income Tax Act 1961 ('IT Act'), in excess of the tax payable, computed on the basis of normal provisions of the IT Act. Such excess amount can be carried forward for set off against future tax payments for ten succeeding years in accordance with the relevant provisions of the IT Act. Since such credit represents a resource controlled by the Company as a result of past events and there is evidence as at the reporting date that the Company will pay normal income tax during the specified period, when such credit would be adjusted, the same has been disclosed as "MAT Credit Receivable", under "Long term loan and advances" in balance sheet with a corresponding credit to the Statement of Profit and Loss, as a separate line item. Such assets are reviewed as at each balance sheet date and written down to reflect the amount that will not be available as a credit to be set off in future, based on the applicable taxation law then in force.

2.8 Earnings per share

The basic earnings per share ('EPS') is computed by dividing the net profit after tax for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year and dilutive common equivalent shares outstanding during the period, except where the results would be anti-dilutive.

2.9 Provisions

The Company recognizes a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources.

Anil Kumabdy

@lakme

PRIME WEB SERVICES PRIVATE LIMITED

Notes to financial statements for the year ended 31 March 2023 (continued)

2. Significant accounting policies (continued)

Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

Onerous contracts

Provisions for onerous contracts i.e. contracts where the expected unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of a past event, based on a reliable estimate of such obligation.

Contingencies

Provision in respect of loss contingencies relating to claims, litigation, assessment, fines penalties, etc are recognized when it is probable that a liability has been incurred and the amount can be estimated reliably.

2.10 Contingent liabilities and contingent assets

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions, but are disclosed unless the possibility of outflow of resources is remote. Contingent assets are neither recognized nor disclosed in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognized in the period in which the change occurs.

2.11 Leases

Assets taken on lease where the company acquires substantially the entire risks and rewards incidental to ownership are classified as finance leases. The amount recorded is the lesser of the present value of minimum lease rental and other incidental expenses during the lease term or the fair value of the assets taken on lease.

For operating leases, lease payments (excluding cost for services and maintenance) are recognised as an expense in the statement of profit and loss on a straight line basis over the lease term. The lease term is the non- cancellable period for which the lessee has agreed to take on lease the asset together with any further periods for which the lessee has the option to continue the lease of the asset, with or without further payment, which option at the inception of the lease it is reasonably certain that the lessee will exercise.

2.12 Cash and cash equivalents

Cash and cash equivalents are short-term, highly liquid investments that are readily convertible into cash with original maturities of three months or less. Cash and cash equivalents consist principally of cash and deposits with banks.
